REQUEST FOR CORRECTED FILING RECEIPT

Assistant Commissioner for Patents  
Office of Initial Patent Examination  
Customer Service Center  
Washington, D.C. 20231

Dear Sir:

Applicants hereby request a corrected filing receipt for the above-identified application. On the enclosed copy of the official filing receipt, the continuing data is incorrectly worded. It should read "CONTINUING DATA AS CLAIMED BY APPLICANT - THIS APPLICATION IS A DIV OF 09/074,455 05/07/1998 AND CLAIMS BENEFIT OF 60/046,188 05/12/1997 AND 60/072,121 01/22/1998". A copy of page 1 of the Specification as filed indicating the correct wording for the continuing data for the two provisional applications is enclosed herewith.

Since Applicants are not responsible for this error, no fee is enclosed.

Respectfully submitted,

Dated: November 15, 2000

Gunnar G. Leinberg

# NON-OCULAR CIRCADIAN CLOCK RESETTING IN HUMANS

## BACKGROUND OF THE INVENTION

RECEIVED  
JAN 30 2001  
TC 3700 MAIL ROOM

### 5 1. Field of the Invention

This application claims the benefit of U.S. Provisional Application No. 60/046,188 filed May 12, 1997 and U.S. Provisional Application No. 60/072,121 filed January 22, 1998. This invention was made with Government support under Grant No(s). R01MH45067 and K02MH01099, awarded by the National Institute of Health.

10 The Government has certain rights in the inventions. This invention relates to a method for resetting the phase of the human circadian clock and for enhancing alertness and performance in humans by application of non-solar photic stimulation, in the range of 15 to 150,000 lux, to any non-ocular region of the human body.

### 15 2. Related Art

As with all vertebrates, humans exhibit temporal organization in behavior and in numerous physiological functions. In response to the natural alternation in light and dark, virtually all species have developed endogenous rhythms with frequencies close to 24 hours. These internally generated, self-sustaining rhythms are known as circadian

20 rhythms (from the Latin *circa* = about, and *dies* = day). The pervasive nature of such rhythms suggests that circadian temporal organization is vital to the overall well-being of the organism. Numerous systems and functions are mediated by the circadian system including hormonal output, body temperature, rest and activity, sleep and wakefulness, and motor and cognitive performance. In all, literally hundreds of circadian rhythms in

25 mammalian species have been identified.

Left to run at its inherent frequency, the human biological clock that is responsible for the generation of circadian rhythms exhibits a daily periodicity of slightly longer than 24 hours. Thus, a daily correction to the clock must be made for our internal rhythms to remain synchronized or 'entrained' to the natural 24 hour day. It is widely accepted that

30 exposure to the natural light/dark cycle provides the strongest signal to entrain the human circadian system to the geophysical day. Inadequate exposure to light of sufficient intensity is a contributing factor in disorders associated with biological rhythm disturbance, such as seasonal affective disorder (SAD), jet lag from transmeridian travel, shift work and some types of insomnia (advanced and delayed sleep phase syndromes).

35 Timed exposure to artificial bright light to the eyes has been used successfully to treat

## FILING RECEIPT

\*OC000000005505514\*

Date Mailed: 10/26/2000

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the PTO processes the reply to the Notice, the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**LICENSE FOR FOREIGN FILING UNDER  
Title 35, United States Code, Section 184  
Title 37, Code of Federal Regulations, 5.11 & 5.15**

**GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 36 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15 (b).

**PLEASE NOTE the following information about the Filing Receipt:**

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 600 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
- If your application was submitted under 37 CFR 1.10, your filing date should be the "date in" found on the Express Mail label. If there is a discrepancy, you should submit a request for a corrected Filing Receipt along with a copy of the Express Mail label showing the "date in."
- The title is recorded in sentence case.

Any corrections that may need to be done to your Filing Receipt should be directed to:
